Telegram: *+256781181516*

~~ANNEX III: PROJECT RISK FRAMEWORK~~

[ANNEX IV: DIVINE DISTRICT ASSEMBLY MITYANA ORGANOGRAM](#)22

[ANNEX V: OVC VULNERABILITY INDEX TOOL](#)1

ABSTRACT

Mityana District like other District in Uganda has a high percentage of people living under the poverty line. Divine District assembly is a restoration arm of Mityana District and a non-profitable assembled group of citizens of Mityana District that aims at development and empowerment of people at community level for self-sustainability and restoration of mother earth.

The Assembly through its constitution is mandated to implement and support any development interventions aimed at uplifting the quality of life of the people of Mityana District. It is thus upon this mandate that the assembly is writing this proposal.

The Community Empowerment for Self-Sustainability (CE4SS) Project is a two year project and will contribute to solving challenges of rising numbers of orphans, education challenges, malnutrition, sanitation, HIV/AIDS and uplift Income levels of underprivileged populations in Mityana District. The project aims to improve the quality of life of underprivileged populations of Mityana District by:

1. Providing supplementary basic needs to include food, clothing, and scholastic materials, medical and school fees to underprivileged populations of Mityana District.
2. Creating awareness on the Global /restoration Plan to the population of Mityana District.
3. Supporting formation of assemblies at the community level in Mityana District.

The project is intended to have the following outcomes:

- i. Improved quality of life at household level
- ii. Improved measures on restoration of mother earth
- iii. Informed communities that can determine their needs and
- iv. Assemblies formed at community level
- v. Community plans to restore their social and financial stability

The project will directly benefit primary (**148,625** persons) and secondary (**28,852 persons**) beneficiaries.

The project will be implemented by Divine District Assembly Mityana through its committees. In addition, the project will cost a total of UGX. **19,489,320,240 /=**, Dollars: **5,413,700,272**.

1.0 PROJECT CONTEXT AND BACKGROUND

1.1 Introduction

This proposal highlights the Community Empowerment for Self-Sustainability (CE4SS) Project that will support the people of Mityana District initially through provision of basic needs. Mityana District like other District in Uganda has a high percentage of people living under the poverty line. There is need to restore the self-sustaining life of people of Mityana District by scaling up their quality of life.

Divine District assembly is a restoration arm of Mityana District and a non-profitable assembled group of citizens of Mityana District that aims at development and empowerment of people at community level for self-sustainability and restoration of earth.

The Assembly through its constitution is mandated to implement and support any development interventions aimed at uplifting the quality of life of the people of Mityana District. It is thus upon this mandate that the assembly is writing this proposal.

1.2 Background

Mityana District is in the [Central Region](#) of [Uganda](#). The District is made up of ten (10) Sub-Counties (Ssekanyonyi, Namungo, Bulera, Kikandwa, Butayunja, Kakindu, Maanyi, Kalangaalo, Bbanda and Malangala), three (3) divisions (Tamu, Central, Busimbi), two (2) Town Councils (Zigoti, Busunju) and one municipality (<https://mityana.go.ug/about-us>).

Mityana District is bordered by [Kiboga District](#) to the north, [Nakaseke District](#) to the northeast, [Wakiso District](#) to the east, [Mubende District](#) to the west, [Mpigi District](#) to the southeast, and [Butambala](#) and [Gomba](#) Districts to the south. The District headquarters at Mityana are approximately 77 kilometres (48 mi), by road, west of [Kampala](#), Uganda's capital and largest city. The coordinates of the District are 00 27N, 32 03E (https://en.wikipedia.org/wiki/Mityana_District).

In 2020, the District population was estimated at 362,500; 184,500 females and 178,000 males; 249,500 in rural, 113,000 in urban (https://www.citypopulation.de/en/uganda/admin/central/068__mityana/). Mityana District has 667 communities/ villages. This is detailed in table 1 and 2 below.

Table 1: Population per sub-county / division and town council

Name	Category	Population
Kakindu	Sub county	20,300
Bbanda	Sub county	15,000
Bulera	Sub county	33,000

God's will be done

Busimbi	Division	47,100
Busunju	Town Council	7,800
Butayunja	Sub county	12,000
Central Division	Division	24,800
Kalangalo	Sub county	33,700
Kikandwa	Sub county	32,700
Maanyi	Sub county	23,400
Malangala	Sub county	26,600
Namungo	Sub county	19,000
Ssekanyonyi	Sub county	33,800
Ttamu	Division	33300

Table 2: Total Population by Age group of Mityana District

Age group	Male	Female	Total
0-9 Years	60,806	57,180	117,986
10 – 19 Years	47,113	47,359	94,473
20 – 39 Years	43,693	48,569	92,262
40 – 59 Years	18,340	20,913	39,253
60 Years & above	8,048	10,479	18,527
Totals	178,000	184,500	362,500

Agriculture is the main income-earning activity in the District. The crops grown include [sweet potatoes](#), [beans](#), [cassava](#), [maize](#), [bananas](#), [groundnuts](#), [onions](#), [cabbage](#), and [tomatoes](#). Cash crops grown in the District include [coffee](#) and [tea](#). There are several large-scale tea estates in the District, including [Namutamba Tea Estate](#), located at Namutamba, and [Mwera Tea Estate](#), located at Mwera and a member of the [Madhvani Group](#) (<https://mityana.go.ug/about-us>).

1.2.1 Divine District Assembly Mityana (DDAM)

DDAM is a restoration arm of Mityana District and a non-profitable assembled group of citizens of Mityana District. Divine District assembly aims at development and empowerment of people at community level for self-sustainability. The assembly is based on the need to implement the global restoration plan institution by the global repository of the world trustee. This will be achieved through provision of community support items, setting up community

God's will be done

development assemblies across Mityana District and implementing the restoration plan basing on the natural law.

2.2.1.1 Assembly vision

Communities that are self-governing, self-sustaining and also contribute to the restoration of earth making it a better place that is pleasing to the Almighty God, Source the creator.

2.2.1.2 Assembly mission

To support communities with basic needs and empower them to form assemblies through which they will develop and implement their self-governing and self-sustaining plans that contribute to the restoration of mother earth.

2.2.1.3 Assembly objectives

1. To create a network of all the people of Mityana District to achieve self-governance and self-sustaining status through formation of assemblies.
2. To promote and preserve cultural values and practices of the people of Mityana District.
3. To increase access to basic needs, social services and infrastructure to the people of Mityana District.
4. Promote holistic environmental friendly practices in homes, agriculture, health, transport, ICT and Education in Mityana District.
5. To economically empower communities in Mityana District to ensure self-sustainability.

2.2.1.4 Assembly Values

- **Equity and equality** – Achieving social justice for the communities with a special focus on disadvantaged persons in meeting their needs.
- **Transparency & accountability** – being transparent in all undertakings and being accountable to the communities we serve.
- **Innovation** – Being creative, strategic and thinking natural

2.2.1.5 Assembly Authority

Kimberly Ann Goguen is the Guardian of the planet, it is under her authority that we established our assemblies; she has secured our freedom and sovereignty from the order that has held us in bondage for lifetime. Currently we have the opportunity to arm our rights as sovereign beings and establish a frame work for self-governance and the restoration of earth. We established our assemblies and this Authority by signing natural law for the living beings of earth.

2.2.1.6 Assembly Structure

The assembly utilizes a bottom up structure in its work; starting with the

God's will be done

community to District level. Divine District Assembly Mityana is composed of committees with representatives at all levels.

Divine District assembly is composed of 8 (eight) committees (as illustrated in [3.1](#)). Each of these committees is made up of five (5) members (committee chairperson, treasurer, secretary, mobiliser and a communication/information person). This structure is mirrored at the community level to ensure effective trickle down of information and services.

2.2.1.7 Assembly Project Implementation Approach

Assembly projects are implemented through committees. Committees are both at assembly and community levels and this approach is preferred because it empowers committees to manage projects specific to their area of focus. This also ensures transparency and accountability within the projects and the assembly structures and also endures efficiency.

1.3 Problem Analysis

Mityana District has been faced with a combination of problem areas as elaborated below:

- **Rising numbers of orphans:** Mityana District has a challenge of growing numbers of orphaned children because of civil wars, diseases and poverty. Mityana District holds quite a higher percentage of orphan population per capita compared to other Districts in Uganda and yet the number is continuously increasing. This has been attributed to by the high mortality rate of male parents especially as a result of diseases, accidents and other eventualities as a result of poverty. It has been estimated that Mityana District has over 70,000 orphans (<https://samaritansforchildren.org/problem-statement/>).
- **Education:** As a result of the growing orphan and widow population in Mityana District, there is a matching increase of children school drop outs due to lack of school fees, scholastic materials and also parental moral support. This has led to children of school going age to start traversing the streets and communities in search of food and other basic needs.
- **Malnutrition:** Majority of Mityana population is dependent on peasant farming and as such depends of farm harvest for food and income. These harvests are often not sufficient thus leading to a shortage of food and thus poor nutrition which negatively impacts both children and adults.

God's will be done

- **Sanitation:** In Mityana District, it is prevalent that the levels of sanitation are low and as a result this has been responsible for many water borne diseases that have further increased household costs and losses due to hospitalizations and deaths. This has contributed to the increase in poverty levels.
- **HIV/AIDS:** Over the years HIV-AIDS prevalence in Mityana has been increasing among the key populations in the District and this has led to increase in deaths and thus orphans and poverty.
- **Income:** Majority of Mityana population is dependent on peasant farming on small plots of land. The harvests are barely enough for food supplies and yet they need some income for other needs. In the long run the families are forced to sell off some produce which makes them vulnerable to food insecurity.

2.0 PROJECT DESIGN

2.1 Project Goal

The goal of the project is to improve the quality of life of underprivileged populations of Mityana District through support, empowerment and restoration of mother earth.

2.2 Project Objectives

1. To provide supplementary basic needs to include food, clothing, and scholastic materials, medical and school fees to underprivileged populations of Mityana District for 24 months.
2. To create awareness on the Global /restoration Plan to the population of Mityana District for 24 months.
3. To Support formation of assemblies at the community level in Mityana District for 24 months.

2.3 Project Beneficiaries

The project will have benefits at three levels; primary beneficiaries (**148,625** persons), secondary beneficiaries (**28,852 persons**) and tertiary beneficiaries (unlimited).

Primary beneficiaries: The Project will directly benefit Orphans and Vulnerable Children (OVCs), youth, elderly, women, widows, and people with disabilities, large households and Internally Displaced People (IDPs). The total primary beneficiaries will be approximately **148,625** individuals who are 41% the population of Mityana District. This is so because **41% of people in Mityana District live in poverty.**

God's will be done

Secondary beneficiaries: The Project will benefit **58** assembly members, **115** office staff, **26,680** community committee members and approximately **2,000** community suppliers of food and other commodities in the project.

Tertiary beneficiaries: The project will benefit other community members that directly or indirectly benefit from the primary and secondary beneficiaries.

2.4 Project Activities, Outputs and Outcomes

2.4.1 Project activities

The project managed by Divine District Assembly Mityana through its committees will implement the following activities:

- i. Procurements of office and storage space.
- ii. Conduct an assessment to determine the vulnerable persons/ households and specific needs.
- iii. Conduct planning meetings both at the District assembly level and at the community level.
- iv. Procurements of office materials, equipment, vehicles, community beneficiary support materials, promotional materials and other required procurements.
- v. Delivery of beneficiary support items and materials monthly.
- vi. Mapping health facilities in the communities and signing Memorandum of Understanding (MoUs) with them to provide health services.
- vii. Mapping schools in the communities and signing Memorandum of Understanding (MoUs) with them to provide services.
- viii. Payments to all service providers.
- ix. Conduct community awareness sessions on the GRP and formation of assemblies.
- x. Supporting the formation of assemblies at the community level.
- xi. Capacity development of the assemblies to identify their needs and solutions.
- xii. Monthly progress meetings.

God's will be done

- xiii. Monitoring and evaluation of project activities
- xiv. Annual audits

2.4.2 Project outputs

- i. Needs assessment report
- ii. 5 planning meeting reports
- iii. 24 monthly meeting minutes
- iv. Materials, items, vehicles, equipment procured
- v. Monthly reports of delivery of items to communities
- vi. List of schools and medical facilities generated
- vii. MoUs with schools and medical facilities signed
- viii. Community awareness reports
- ix. List of community assemblies formed and reports
- x. Capacity development reports of assemblies
- xi. Quarterly and annual reports

2.4.3 Project outcomes

- i. Improved quality of life at household level
- ii. Improved measures on restoration of mother earth
- iii. Informed communities that can determine their needs and
- iv. Assemblies formed at community level
- v. Community plans to restore their social and financial stability

2.5 Project Strategy

Implementation of the project will be guided by assembly committees. Each assembly committee will spear head the implementation of its related activities. Committees that require skilled personnel will enroll skilled personnel into their committees to provide professional contribution to the committees but will still be required to work closely with the committee members and also report to the assembly committee.

a. Selection of community committees

Each community shall have committees mirroring the assembly committees. In other words, each committee at the assembly level will have a subsequent committee at the community level. The community level committees will be formed by the assembly committees and will have exactly the same membership and roles.

Each community has a local leader and this leader will be consulted in the establishment of community committees. These community committees in collaboration with the assembly committees will thus be responsible for planning, budgeting, receiving and distribution of committee specific support items and materials to the

God's will be done

beneficiaries in their communities.

b. Selection of vulnerable persons

Both District assembly and community committees will participate in the identifying of vulnerable families/households. Prior to the District assembly and community committees assessment of vulnerable households and individuals, the local community leadership will be asked to recommend vulnerable households and individuals in their localities. The recommended households and individuals will then be subjected to the Vulnerability Index Tool (attached as annex 3) to measure their level of vulnerability. The households and individuals that will come out vulnerable according to the scale of the Vulnerability Index Tool will then be considered for the project and will thus be re-visited to ascertain their specific needs and details. A situation where the vulnerable households and individuals outweigh the planned numbers, the extra numbers will be incorporated into the project and this will call for preplanning so as to cater for the extra numbers. On the other hand, if the vulnerable households and individuals are less than the planned numbers, the extra resources will be used to cater for other needs by the beneficiaries that were not originally planned for as will be shown in the reports.

c. Health/ Medical service provision

The health and wellness District assembly and community committees will be responsible for implementing health/ medical services to the beneficiaries. A Memorandum of Understanding (MoU) will be signed between the assembly and health centers/ dispensaries/ clinics/ hospitals/ doctors in the area of operation to provide services to the target population. This MoU will stipulate the category of beneficiary, the services to be provided and the mode of payment. It is proposed therefore that an annual health cover (insurance) package will be agreed on with the service providers for each beneficiary. Payment will be made in advance to the service providers to enable them have resources to provide the services to the beneficiaries effectively. The health/ medical committees at the District assembly and community levels will be responsible for the whole chain of activities in this service provision.

d. School fees support

The education District assembly and community committees will be responsible for implementing education services to the beneficiaries. A Memorandum of Understanding (MoU) will be signed between the assembly and education centers in the area of operation to provide services to the beneficiaries. This MoU will stipulate the category of beneficiary, the services to be provided and the mode of payment. In selected households that have school going children, a support on the fees payment will be made directly to the schools. The education committees at

God's will be done

the District assembly and community levels will be responsible for the whole chain of activities in this education service provision.

e. Purchase, storage and distribution of beneficiary items, materials and equipment

A procurement committee at District assembly and community level will be responsible for the procurement of items, materials and equipment following the procurement policy guidelines; the delivery of items to respective committees and overseeing delivery of the same to beneficiaries. Suppliers will be sought and contracted to supply the items, materials and equipment and also payment made following the procurement policy guidelines. First priority will be given to local suppliers in the communities. In case the suppliers in the communities are unable to meet the demand, outsourcing for the rest of the supplies will be considered. This is intended to further strengthen the community economic empowerment.

Safe storage space will be secured for the storage of items/ materials following the inventory management system from which they will be packaged for delivery to the beneficiaries. This will be the responsibility of the District assembly procurement committee.

Purchased items will be packaged and marked with tags stipulating the destination upon which delivery will be made to respective destinations. Delivery trucks will be hired to deliver items to the door steps of the beneficiaries. This will be done in collaboration with the community teams. Upon delivery of items delivery notes will be signed by the beneficiaries as proof of receipt of the items.

3.0 PROJECT MANAGEMENT

Divine District Assembly Mityana committees manage and coordinate the entire project activities with support from community committees. Professional staff; co-workers (*shown in the organogram*) will support the project at both the District and community levels to ensure effectiveness, efficiency and also provide expert opinions.

3.1 Assembly committees in project implementation

Divine District Assembly Mityana is made up of eight (8) committees that implement assembly activities in line with their area of focus.

a. Secretariat committee

The secretariat committee is at the top of the management ladder and it oversees the work of all the other committees in the assembly and community. This committee is composed of the presiding officer, secretary, treasurer and professional staff in the project. All the other committees report to this committee, the committee compiles, analyses and reports on the entire project.

God's will be done

In addition this committee also focuses on assessments; monitoring and evaluation and project management. This committee has the discretionary powers to evaluate committee work plans and budgets submitted; approve or disapprove them and monitor the human resource and expenditure during implementation of the work plans so as to ensure compliance.

b. Human resource and procurement committee

The human resource and procurement committee will be solely responsible for both internal and external human resource welfare, performance and adherence to the Human Resource policy guidelines. It will also be responsible for procurement, storage and delivery of beneficiary items to their respective destinations.

c. Treasury, finance and M&E committee

This is the backbone of the project. This committee will oversee the financial, asset management and monitoring and evaluation aspects in the project. It will ensure proper adherence of project staff, assembly and community committees to financial policies and guidelines, making payments, monitoring and evaluation of use of finance and other project resources. It will ultimately ensure value for money in the project. This will also be responsible for audits and financial reporting and it will be responsible for ensuring that work is done according to plan and budget. This committee will work closely with the finance department and M&E officers to support activities in the project and disseminate recommendations to other committees for implementation.

d. Health, Family services and wellness committee

The health, family services and wellness committee is responsible for provision and access to health/ medical services, source for health centers/ dispensaries/ clinics/ hospitals/ doctors and then sign a Memorandum of Understanding (MoU) with them to provide services to the target population. The committee will also be responsible for ensuring that payment is made to the service providers as agreed on in the MoUs. The committee will also focus on family welfare, standards and approaches to improve the quality of life of families at household level. Recommend new ideas to the assembly which would enhance the standards of living and quality of family life in the society, so this will include, family and household issues, traditions, entertainment and sports, etc. lastly, since the human being is more than physical body, health and wellness should cover all the aspects the human being. The committee shall be responsible for the health care and total wellbeing of the human being and propose ideas on how to improve the standards of life and care in Mityana District.

e. Education, public works and infrastructure committee

God's will be done

Education of child is the responsibility of parents. This committee is aimed at creating new ways to improve and develop education methodology that promotes the nature and potentials of each child. It will work closely with parents in developing what is best for the child. In the project, the committee will be responsible for all activities to do with children education. This will include the contracting of schools, provision of scholastic materials and ensuring that payments are made to schools according to agreed terms.

This committee is responsible for public assets and policies, to provide and sustain structures and services essential to the welfare and acceptable quality of life for the citizens. They include schools, hospitals, transport infrastructure, roads, railroads, bridges, pipelines, canals, airports, public space, public squares, parks and beaches, public services & electrical grid.

This committee will also support the health and wellness and the education committees in the specific intervention implementation. In addition, this committee will assess needs for public services in the communities as the project is being implemented so as to guide the next phase of implementation that will involve public services in health, education, roads and other public service areas that will be deemed necessary.

f. Security & law enforcement committee

Security is important for any project to function. This takes care of the office premises, stores and movements of beneficiary items. Therefore this committee at assembly and community level will oversee the observation of law and order during project implementation and even after. This committee is mandated to correct all misunderstandings among assembly members and community committees

g. Agriculture and environment committee

This committee will be responsible for all agriculture and environmental related interventions. It will ensure farmers get required skilling, inputs, expert advice and market for their produce.

In addition this committee will ensure environmentally friendly practices in the project both to support the agriculture components, health, education and any other aspects of the project that have an effect on the environment. This committee shall also raise environmental awareness among all the communities and to keep abreast of research and developments that pertain to environment & to recommend policies for adoption by the committee in order to promote conservation.

h. Communication, Public Relations (PR) and Information Communication Technology (ICT) committee

God's will be done

Information is very important in this transition period to help the people realize what is happening concerning the final collapse of the old and rising of the new. The committee will oversee all communications in and out of the assembly. This will include communications through print media, radio, television, social media and any other communications. The office of the PR will work closely with the office of the secretariat in the area of public enlightenment and relations. PR Will represent the assembly in media and all public related events. The ICT person will ensure proper use and functionality of the technologies in the assembly and community committees. This committee will provide support and technical advice during procurement, use and disposal of IT related infrastructure in the project.

3.2 District assembly committees, community committees and co-workers

District assembly committees, community committees and co-workers will be the implementation work force of the project. Co-workers will provide professional services in the implementation of the project. The distribution of these persons is illustrated in table 3 below.

Table 3: District assembly committees, community committees and co-workers

Department	Number
Assembly committees	
District assembly committees	58
Community assembly committees	26,680
Co-workers -115	
Procurement senior lead	1
Procurement lead	4
Stores (lead assistants)	20
Finance senior lead	1
Accountants (lead)	2
Account assistants (lead assistant)	4
MEAL senior lead	1
M&E officers (lead)	5
M&E Assistants (lead assistant)	10
Human Resources & Admin senior leads	2
Admin Assistants (leads)	2
Janitors (support)	10
Security (support)	6
IT (1 Senior lead & 1 lead)	17
Fleet lead (lead and assistants)	4
Drivers (lead assistants)	50
Audit (internal) (lead)	5
Communication (Lead)	5

God's will be done

Public Relations	2
Total	36,889

Note: An external audit firm will be hired to carry out periodic audits and a Monitoring and evaluation consultant to carry out evaluations.

4.0 PROJECT MONITORING AND EVALUATION

A variety of formal and informal Monitoring and Evaluation mechanisms will be central to ensuring appropriate delivery of effective and sustainable services. These will include but not limited to beneficiary surveys. The monitoring and evaluation activities will be guided by the monitoring and evaluation framework attached as Annex III.

For effective reporting, mobile data collection tools apps on mobile devices will be used. Mobile devices will be provided at district and community level. These devices will have the ability to synchronize with a central data base at the assembly and thus reports generated. This will ensure timely reporting and quality of data.

5.0 PROJECT SUSTAINABILITY PLAN

Building capacity of community committees to mobilize communities to establish and manage their own community assemblies will enable them sustain the activities that will have been initiated by the District assembly. This is so because the communities will have been enlightened on what needs to be done so as to uplift their quality of life and how to mobilize resources to facilitate that.

In addition the project will avail students with a chance to education, which will in the long run increase their chances of employment and also their innovativeness to manage income generating activities social services and infrastructure. This will have a long term contribution on the social and economic development on the communities.

One of the major expenses in households is medical expenses. In most communities, health centers/ clinic charge high fees for medical services which in most cases leave households financially low when they have a sick person. Health services will improve the quality of life of the people in the communities. Healthy people are able to work, earn income, with guidance use the income for income generating activities and then earn more income. This makes the people more financially stable and as a result of financial stability, there will be a sustainable access to basic needs including health/medical services.

God's will be done
